Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 February 2009.

DETAILED ACTION

Status of the Claims

1. This action is in response to the amendment filed on February 6, 2009. Claims 1-3, 5-10, 12-17 and 19-21 are pending and examined below. Claims 4, 11 and 18 are canceled. Claims 1, 5, 8, 12, 15 and 19 are amended.

Response to Arguments

2. Applicant's arguments with respect to claims 1-3, 5-10, 12-17 and 19-21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-2, 6-9, 13-16 and 20-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Bimson et al., US 2002/0046244 A1.

As to claims 1, 8 and 15, Bimson teaches a method, a computer system, and a computer readable media of updating Web pages of an e-commerce storefront, comprising (abstract):

- accessing, on a web browser, a Web page out of a plurality of Web pages of an e-commerce Web site over an intranet link (¶ 23 and Fig. 1);

- submitting log in information to the Web site over the intranet link, wherein said log in information is for providing privileges sufficient to enable editing of the Web site, and wherein said intranet link is separate from an Internet communication link (§§ 23, 29 and Figs. 1 and 5);
- invoking a web page editor having a graphical user interface for editing the Web page, wherein the web page editor is invoked on the web browser over the intranet link (§§ 24, 29 and Figs. 2, 5);
- selecting an item on the Web page to modify (§§ 24, 29);
- editing the item on the Web page using the graphical user interface to create an updated version of the Web page (§§ 24, 29);
- submitting the edited item to the Web site (§§ 24, 29);
- receiving the updated version of the Web page over the Internet communication link (§§ 23, 29 and Figs. 1, 5); and
- displaying the updated version of the Web page on the web browser (§§ 23, 29).

As to claims 2, 9 and 16, Bimson teaches logging into the Web site with an authentication to obtain privileges for modifying Web pages of the Web site (§§ 23, 29).

As to claims 6, 13 and 20, the limitations for submitting a first log in information to obtain a first privilege level for editing the Web page and submitting a second log in information to obtain a second privilege level for editing the Web page, wherein the second privilege level is higher than the first privilege level for modifying a greater

number of items of the Web page than the first privilege level are taught by Bimson as assigning different privilege level for editing the Web page (¶ 30).

As to claims 7, 14 and 21, Bimson teaches generating a workflow notification to request an approval of the updated version of the Web page, wherein the updated version of the Web page is not provided until the approval is obtained (Fig. 2).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3, 10 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bimson et al., US 2002/0046244 A1.

As to claims 3, 10 and 17, Bimson teaches receiving updated version of the Web page to view and verify the edit item as discussed above. Bimson does not specifically teach logging out the Web site prior to receiving the updated version of the Web page. It would have been obvious to one of ordinary skill in the art to allow Bimson's teaching to include the feature of logging out the Web site prior to receiving the updated version of the Web page for reducing the conflict between the modification and updating of the web content.

7. Claims 5, 12 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bimson et al., US 2002/0046244 A1 in view of Moore et al., US 2001/0049672 A1.

As to claims 5, 12 and 19, Bimson teaches viewing the updated version of the Web page (Fig. 2). Bimson does not specifically teach viewing the updated version of the Web page using a web browser on a client machine to verify the appearance of the edited item, the appearance being the same as the appearance to a standard user accessing the updated version of the Web page. However, Moore teaches this matter (¶ 93). It would have been obvious to one of ordinary skill in the art to allow Bimson's teaching to include the feature of using a web browser on a client machine to verify the appearance of the edited item being the same as the appearance to a standard user accessing the updated version of the Web page for ensuring the quality of the edited item.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
